Sirius is Respected As A God

The effects of Sirian energy and influences from 1993/4 created renewed interest in the most influential heavenly body. Sirius, AKA the dog star is described as "he who awakens the Gods of air & summons the to their office of bringing the rain. As Hindu's call this star the Rain Star. Ancient Egyptians called the star the "Nile Star or Star (soul) of Isis. It's annual appearance is just before dawn during Summer Solstice (June 21). Around July 4, Sirius is hidden by the sun's glare. The Ancient Egyptians refused to bury their dead during the 70 days the star was hidden. They believed this meant the door to the afterlife was closed.

Sirius The Dog

Sirius is also known as mythology' s watch dog for the Heavens. Guarding the bridge of the Milky Way, guarding the abyss into incarnation. It's a symbol of power, steadfastness of purpose and will. Which exemplifies the initiate who unified higher and lower consciousness (similar to a Gemini).

The Chinese recognize the area of this bridge as Heaven and Hell. The higher mind gathers the experiences of the personality. The soul judges each past life and the circumstances needed to promote growth. Given these circumstances are attached to desire, sensation and required experinces, the soul continues to reincarnate. The soul can't pass over the bridge until the journey is protected.

Sirius- The Hound From Hell

Astronomer Aratus referred to Canis Major (googleable term) as the guarded dog of Orion (googleable term). Walking behind his master on his hind legs with the alpha star Sirius in its jaws. The concept of the mind slaying the real relates to the dog being both the hunter and the killer. Aka, the hound from Hell. Sirius reps Laelaps, a dog so swift, no prey could escape it. The dog was said to be owned by various members of Greek royalty. Including Zeus.
